

Cs2 ITEC bietet Ihnen als Berufseinsteiger oder erfahrenem Spezialisten ausgezeichnete Möglichkeiten der fachlichen und persönlichen Weiterentwicklung.

Bei spannenden und abwechslungsreichen Tätigkeiten für internationale Großkunden und Konzerne, bauen Sie, je nach Aufgabenstellung und Position tiefes Fachwissen in neuesten Technologien oder breites Projektleitungs- bzw. Führungs-Know-how auf. Durch die Vielzahl unserer Themen können wir Ihnen, je nach persönlichen Wünschen, verschiedene Technologiebereiche und Aufgabenstellungen anbieten.

Project Manager Validation / Test Manager (m/f/d) for Middleware & Integration

Standort: Erlangen

Diese Aufgaben warten auf Sie:

- You define, adapt and document test concepts and plans according customer and quality goals
- You handle estimations, planning and monitoring of test activities
- You drive the implementation and optimization of relevant processes, toolchains and test environment
- You align regular and proactive with project teams and stakeholders as well as internal and external customers
- You monitor the project progress and manage risk and deviations
- You actively seek for synergies and drive efficient cooperation in a distributed and international setup
- You create required reports on a regular basis and are responsible to monitor and control costs and efforts
- You are willing to travel, to support the customer and the supplier teams.

Was Sie mitbringen sollten:

- You have a university degree in computer sciences electronics or similar
- You have several years of experiences as Project and/or Test Manager
- You have an excellent understanding of embedded systems and software architecture
- You could make experiences in test automation development for automotive software systems
- SW engineering for automotive ECUs or embedded systems
- Requirements engineering and test design in automotive software projects
- Experience with integration and verification on different levels, ideally ISTQB certified
- Experiences in the domain of (vehicle) bus communication like CAN or Ethernet and internode communication like SPI are an advantage
- Ideally you have validation experience of AUTOSAR Projects
- You are proactive, teamoriented and selfdependent combined with a structured and precise working style
- You have a confident and solutionoriented appearance towards customers
- You successfully communicate in English; German is a plus

Wir freuen uns auf SIE !
